

Dylan Chun Wong

D.chunwong@berkeley.edu | 1-559-827-5320 | 1732 N. Rova Street, Visalia, CA, 93291

Education

University of California – Berkeley

Graduation Year: 2016

Major: Electrical Engineering and Computer Sciences

Technical Coursework: CS61A, CS61B, CS61C, EE40

Technical Skills

Proficient in: Python, HTML5, CSS3, Javascript, Java (Basic: Haskell, C)

Languages: Conversational Spanish

Projects

more at: <http://github.com/dchunwong>

VoxelJS Capture the Flag

Contributed to an open-source Javascript library by implementing logic for teams as well as map generation and game rules in a voxel environment.

Pixel People

Leveraged JQuery and Facebook APIs to provide an alternate Facebook experience.

Won Hackers @ Berkeley's biannual HackJam.

Geo.ly

Utilizes Node.js, HTML 5, and Google Maps API to create a personal compass to find friends.

Rate my Cat

Won "Learned the Most" hack. Created in a group for a 12 hour hack-a-thon. Uses Flask framework as well as MongoDB to implement an upload, display, and ranking system for pictures of cats.

Image Board

A side project written with a partner over break that uses Node.js, Express, MongoDB, and Jade to create a community image board that includes threading, hover previews, and mass file downloads.

tuneinwith.me

A group project made utilizing Firebase, Node.js, and the Spotify API to create an online jukebox with private rooms and accessible web interface so that friends and guests can decide what music plays.

Work Experience

Quality Assurance—UTest

2010-Present

Testing an average of two products a day for clients before public release

Leadership

Officer—Hackers@Berkeley

2012-Present

Promoting hacker culture on campus through workshops, hackathons, and other events.

Eagle Scout/Boy Scout

2011-Present

Gathered forty peers and spearheaded the group to move several hundred square feet of gravel and cobble stone for final project.
